

Excel Database Creation from PDF

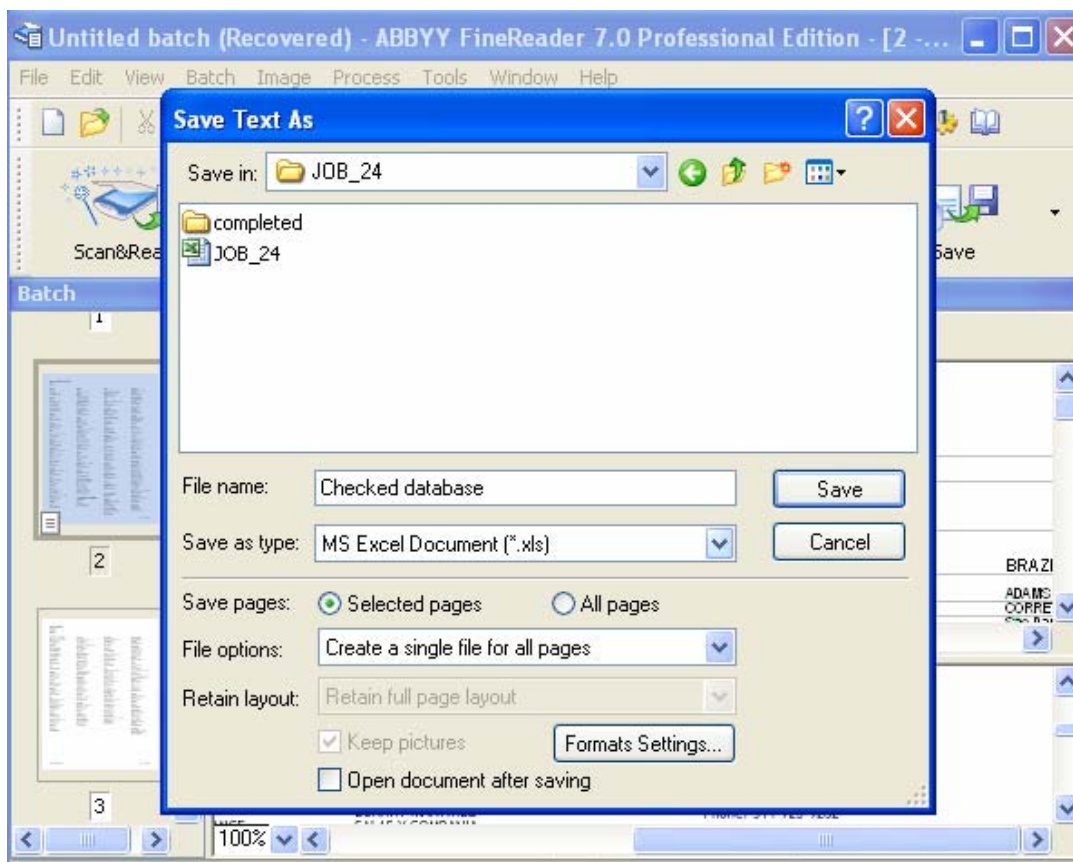

Step 1.

Editing the PDF file using Abbyy FineReader Software

Step 2.

Creating Excel file from Abbyy FineReader

Step 3.

Data collecting from raw database to final database

Raw Database

The screenshot shows an Excel spreadsheet with a messy layout. The data is not organized into clear columns. Headers are missing, and the text is a mix of company names, phone numbers, and other identifiers. The text is partially obscured by a selection box.

Final Database

The screenshot shows an Excel spreadsheet with a clean, structured layout. The data is organized into clear columns with headers: Region, Country, Company, State, Phone, and Fax. The data is consistent and easy to read.

Region	Country	Company	State	Phone	Fax
ASIA /	AUSTRALI	OAMPS	East	61-39-412-	61-39-412-
ASIA /	CHINA	BEIJING	Beijing	86-10-	86-10-
ASIA /	CHINA	BEIJING	Guangzho	86-20-	86-20-

Step 4.

Proof Reading

We take a print of the Pdf & Excel file and run a proof reading on the created Excel file, for 100% accuracy with the original image file.

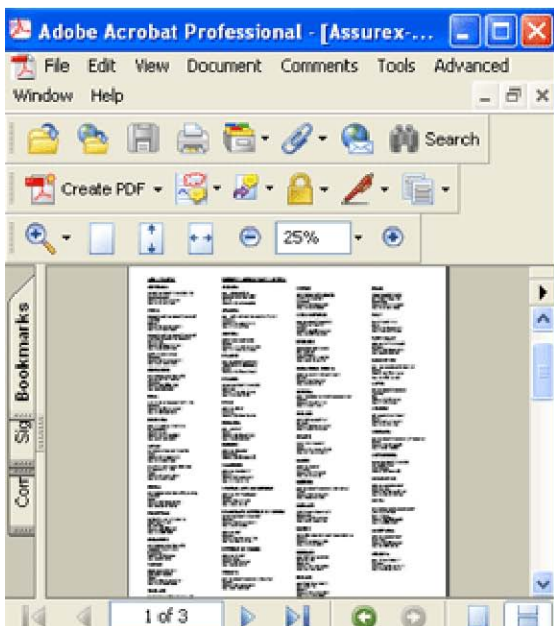

The QC team makes the correction in the excel documents, if any.

Finally

Input : (.PDF)

Out Put : In Microsoft Excel

The screenshot shows an Excel spreadsheet with a clean, structured layout, identical to the 'Final Database' screenshot. The data is organized into clear columns with headers: Region, Country, Company, State, Phone, and Fax. The data is consistent and easy to read.

Region	Country	Company	State	Phone	Fax
ASIA /	AUSTRALI	OAMPS	East	61-39-412-	61-39-412-
ASIA /	CHINA	BEIJING	Beijing	86-10-	86-10-
ASIA /	CHINA	BEIJING	Guangzho	86-20-	86-20-
